

## Updating Blackout dates

**After submitting my Team Commitment Application, how do I submit my blackout dates?**

Usually, the blackout dates will be submitted in the GotSoccer Application for the current Team Commitment Event. For instructions as part of the Team Commitment procedure, please visit the website page Team Commitment.

If the team has submitted the Team Commitment and needs to update the blackout dates, they may be added/changed through the GotSoccer Team Account. This option is only open until the commitment deadline date. At that time, the league will turn the calendar access off.

1. Login to the GotSoccer Team Account
2. Go to the current scheduling event. The usual format is Year Season Schedule WMYSA

3. Click on the Requests tab

4. Go to the month you want to blackout a date and click on the small “X” in the top right corner of the date and the date will show as a requested blackout date at the top. If you already have the maximum dates, you will need clear off a blackout date before you can add another. You can do this by clicking on **Remove** next to the date in left from list of current Requested Blackout Dates list.
